How to Prevent a POWER STRIP Fire

**DO**

Use power strips that have a circuit breaker or fuse and are labeled by a Nationally Recognized Testing Laboratory, such as UL or ETL.

**DON’T**

Plug high current loads into power strips, such as:
- Refrigerators
- Microwave ovens
- Large coffee pots
- Space heaters

**DON’T**

“Daisy-chain” power strips and extension cords (i.e., one plugged into another)
