

Partnership for Nuclear Energy—addresses a critical national need toward accelerating and increasing STEM credentials in the nuclear energy industry.

What is it?

The **Partnership for Nuclear Energy** brings together leading nuclear energy experts to form a comprehensive think tank, consisting of:

- Leading universities
- Community colleges
- Technical skill training organizations
- Industries producing and supporting nuclear reactors (large and small)
- Professional industry organizations
- National research laboratories
- Government agencies

Goal

The primary goal is to develop a set of comprehensive solutions that address and correct STEM shortfalls, whether they exist at the national policy and programmatic levels, within education and training initiatives, and/or federal and private industry investments. This collaborative approach is essential to bridge the gaps and drive collective action and ensure a more comprehensive and sustainable clean energy strategy.

Partner with Us!

The primary purpose of the Partnership for Nuclear Energy is to develop comprehensive solutions that address critical challenges in the nuclear sector. Specific initiatives include:

- **Move from individual efforts** to advance STEM and the industry, to a comprehensive set of actions and recommendations to accelerate positive change.
- **Unite and mobilize leaders and thinkers** from diverse sectors across the nuclear energy field.
- **Create a collaborative environment** that fosters knowledge sharing and collective action.
- **Develop a comprehensive solution set** to address critical challenges and opportunities in the nuclear sector, particularly in education, training, and workforce development

Who We Are

Scientific and technical contractor

75+ years of experience

160+ member university consortium

501(c)(3) nonprofit status

Specialized expertise:

- Workforce Development
& Technical Staffing
- Scientific Assessment
- Health & Environment
- Preparedness & Response
- Research & University Partnerships

Ways to Work With Us

GSA Contracts
